

The proprietary combination of healing herbs and oils in Surivon™ will help promote quick healing of herpes sores. If used regularly, it can help to lessen outbreaks, and may prevent future outbreaks. Surivon™ contains not only lemon balm, but has also been combined with other anti-viral herbs such as St. John's Wort and Neem. Both have wonderful anti-viral herbal healing properties that will help to heal sores quickly. We then add Chickweed herb to help stop the itch. Calendula herb acts as an anti-viral, anti-inflammatory, as well as an antibacterial agent. Calendula is a wonderful wound healer. Comfrey acts as an emollient, and helps to form a protective layer on the skin. Surivon™ will help to heal herpes sores quickly, and with less pain.

There are Three Major Forms of Herpes:

Herpes Simplex Virus-1: The symptoms of HSV-1 herpes simplex infection are cold sores, also known as fever blisters, occurring on the lips, the mouth and even, near the eyes. If one has cold sores, and engages in oral sex, the virus will be passed on to the partner as HSV-2, or genital herpes. It is important to use protection during sex.

Herpes Simplex Virus-2: The herpes simplex HSV-2 causes genital herpes. This type of herpes is characterized by fluid released from herpes blisters and sores near the genitals. Active sores will pass the virus on to a partner. Even when the sores have passed, some shedding can take place. This can expose partners to the virus. It is important to use protection during sex.

Herpes Varicella Zoster Virus VZV or HHV-3: Primary varicella zoster virus infection results in chickenpox. In later life, VZV reactivates producing a disease known as shingles. Chicken pox causes blisters on the abdomen, buttocks, face, arms and legs. Shingles presents much the same as chicken pox. There can be more pain with shingles. The virus is contagious and will be passed on. It is important to keep away from the blisters to prevent infection. If children have been vaccinated against chicken pox, they can contract shingles at a young age. For most, once you have had chickenpox, there is a 50/50 chance of getting shingles. The virus remains dormant in the nervous system, and may or may not become active.

The herbal compound in Surivon was developed to assist in healing the symptoms brought on by the herpes virus. It helps with the pain, inflammation, and itch. There is no cure for the herpes viruses.

Directions for Use: Wash area well. Apply a fair amount to the area. Surivon can be used daily up to 6 times a day if needed. Surivon Lip Balm, and Surivon Lip Therapy can be used every 2-4 hours. Results can take up to 2-4 days. Each person is different.

The Herbs We Use And Why

Lemon Balm (Melissa officinalis) Lemon Balm contains eugenol, which kills bacteria and has been shown to numb tissues. It also contains tannins that contribute to its antiviral effects, as well as terpenes that add to its soothing effects.

St. John's Wort (Hypericum perforatum) Antiviral healing agent. Helps promote healing of nerve pain.

Neem (Azadirachta indica) Antiviral healing agent.

Calendula (Calendula officinalis) is the best herb to have for skin conditions. It is antibacterial, anti-fungal, and antiseptic. It's wound healing properties helps to fight skin infections.

Comfrey (Symphytum officinale) is used for its tissue healing benefits. Comfrey, also known as knit bone, helps to "knit" the damaged cells back together. Comfrey helps heal wounds in short time. The wounded area must be clean, as comfrey works fast. If the area is dirty, infection can start as the germs are trapped inside. Comfrey is an emollient herb, and helps to form a protective layer so skin can heal.

Chickweed (Stellaria media) helps to reduce itch in just minutes.

Lavender, Thyme and Tea Tree essential oils are added for their natural healing benefits.

Surivon is available in 6 formulas.
Surivon is also available as a Sitz Bath
